

SIGNAGE PORTFOLIO

Hello!

Here are a few quick bits of information for you regarding the content of this portfolio:

- 95% of the lettering and elements for the signs in this portfolio are **hand cut** on a bandsaw, scrollsaw, or with a jig saw, and finished carefully by hand as well. I very rarely use a CNC/laser cutter/etc. in my production process, so everything is made with a bit of extra love, care, and artistry that comes from a genuine passion for what I do and who I am creating for.
- I offer full design services, including logo and signage concept design. Some of the signs here are fully custom designs and concepts, some are client ideas fleshed out and brought to life, and some are client provided logos that I've created dimensional designs with.
- I love working with clients to create the best designs possible, and take pride in deeply personalizing these projects whenever possible to make sure they reflect their owner as successfully and creatively as possible. Each sign has it's own story and meaning, and my goal is to build you a unique, personalized, eye catching design that captures the attention of both you and potential customers/viewers.

Thank you for your time, I truly appreciate it and look forward to working with you in the future! More company info, as well as info about my other portfolios can be found on page 22.
